Lagos, Nigeria

PROFILE

I am Odewole Babatunde Samson, a full-stack developer in Nigeria. I have well versed experience in web development, especially as a frontend engineer with React.js and backend with Node.js and PHP.

I am open to lay my hands on many other programming languages depending on the project at hand. I also have experience working with some framework like MaterialUI, Next.js and Express.js. I like and enjoy learning new things that thrills me. I have eyes for well design systems.

I am a very good team player and a critical thinker. I play very well within the scope of software development processes.
